

These are Cotton buds that are growing on a tree.

The children are separating the seeds from the wool.

This ~~woman~~ woman is spinning the ~~cotton~~ cotton into thread.

This is someone putting the thread into rolls.

This is weaving the thread into fabric.

These are people washing fabric.

This is the cotton fabric drying.

This woman is printing the patterns on to the cotton fabric.

This is a boy and he is sewing together the cotton fabric.

This is the finished product at the shops.

# Things that may hinder the Cotton from being made into clothes!

---

- It might rain too much meaning that the cotton will drown and not grow
- The cotton might not grow due to no rain or sunlight
- When the cotton fabric is drying it might rain and be really windy meaning that it could fall on the ground and then go sunny again leaving the cotton fabric all creased
- The conditions that they are living in might be hard to work in meaning that if it was to rain, snow or just be really cold it could slow the process down.
